The great Ulrich Klatte, has done it again, after the fine book on krautrock aptly titled: "Cosmic Price Guide"

The great Ulrich Klatte (author of "Cosmic price guide") has done it again!! This time he took it upon himself, to research and write about the fabulous Vertigo Swirl label!! What an enormous task it must have been. Yes friends of proghistory, serious record collectors and collectors of said label, finally a book that does justice to all the fine artists that surfaced on this very progressive ahead of it time label, as well as to the fine people behind that very (vinyl-wise) sought after label! The cover alone makes this old proghead drool and so will you, once you get your eager proghands on it!!

Not only is it a (vinyl) price guide, it also boast´s catalogue numbers, year of release, band and album title, from the VO series, the 6360 series, isolating the UK releases, the european releases, the south and middle America releases,

Asia releases, USA releases...well you get the picture!

It also has a variety of (those wonderful) original album covers, both front and back including for each: band members, instrumentation, track listings and running time/ minutes per song, release dates and production notes.

So dear progfan and record collector this is a **MUST** own!!

160 pages of essential info on said label, plus some 300 colour pictures of Vertigo Swirl label releases. This is a bible for true record and prog collectors!!

What a great way to start a new year!!! Thanx Ulrich, for this amazing book!!
